EDUCATION

University of Southern California, Dornsife School of Letters, Arts, and Sciences January 2025 - December 2026
Bachelor of Science, Economics and Data Science GPA: 3.7

PROFESSIONAL EXPERIENCE

- Luckin Coffee

Beijing, China

Operations Intern - User Growth

June 2026 - Present

 - Execute lifecycle marketing campaigns by designing segmented prepaid beverage passes, promotional offers, user eligibility criteria, and campaign rules based on customer purchase frequency, supporting initiatives to increase retention, purchase frequency, and customer lifetime value (LTV).
 - Led user research initiatives by conducting 100+ structured interviews with users who opened the Luckin app but did not complete a purchase, uncovering reasons for purchase abandonment, such as overly complex promotions, and delivering actionable recommendations to improve the user experience.
 - Managed five end-to-end user feedback surveys, including designing questionnaires, defining target user segments, and analyzing customer feedback to support product optimization and growth strategies.
 - Coordinated the cross-functional execution of weekly in-app product launches and promotional campaigns, partnering with marketing, product, design, and operations teams to configure digital campaigns, manage internal stakeholder relationships, and monitor post-launch sales performance.
- Xylem Inc.

Pittsburgh, PA

Business Analyst Intern

May 2024 - August 2024

 - Analyzed a \$15M customer portfolio using Excel pivot tables to find that 20% of customers made 80% of revenue, and used this insight to help the sales team focus on high-value customers and improve efficiency by 10%.
 - Cleaned and standardized data from multiple sources (e.g., Excel and SAP) to resolve data inconsistencies, ensuring accurate analysis and supporting better business decisions.
 - Identified stranded inventory issues caused by demand mismatch and poor data visibility; analyzed sales and inventory data using Excel and SAP; and worked with sales and purchasing teams to fix root causes, reducing excess stock by 30% and lowering storage costs.
 - Improved inventory operations by analyzing inconsistent data across systems and redesigning workflows in SAP MM, creating a more standardized process that improved data accuracy and operational efficiency.
- Deloitte

Beijing, China

Consulting Intern - Government & Public Services

Nov. 2024 - Dec. 2024

 - Turned 15+ expert and partner reports from different sources into clear executive briefs by summarizing key insights, reducing review time for senior stakeholders by ~35%.
 - Analyzed qualitative research data to identify key trends, risks, and client needs, helping align priorities across 3+ teams (policy, strategy, and client delivery).
 - Translated complex policy and industry analysis into simple, structured materials, and delivered written proposals to help stakeholders quickly understand key issues and make faster decisions.

PROJECTS

- Applied Business Data Analytics Project

Fall 2025

 - Led end-to-end analytics for a two-person project, integrating data across SQL, MongoDB, and Neo4j, and used AI Tools to assist data cleaning and ensure consistent business logic across datasets.
 - Used SQL to analyze customer orders, payments, and \$30M+ inventory data, and leveraged AI tools to improve query efficiency and speed up analysis of revenue patterns by region.
 - Built predictive models (linear regression, decision trees) on 700+ samples to identify key drivers of sales, and used AI tools to interpret results and improve model understanding. Developed Tableau dashboards and forecasts to communicate insights, and used AI tools to help summarize key findings and support decision-making.

SKILLS & INTERESTS

Data Analytics: Tableau(Data Visualization), Excel (Pivot, VLOOKUP), Python, C/C++, SQL, STATA, Power BI
CRM Operations: Customer Lifecycle Marketing, Growth Marketing, Cross-functional Collaboration
Interests: Skiing, Hiking, Fashion Design, Photography, Traveling, Pilates, Concerts
